INNOVATIVE SOLUTIONS FOR INSPIRING WORKSPACES

Welcome to JEB Acoustic Partitions. Our innovative partition systems are creatively designed and engineered by our in-house design team, as well as lab & field tested to continually achieve the highest performing acoustic ratings.

With over 30 years of global experience, we take into consideration your project scope and requirements to deliver high-quality, high-performance, precision partitions that create flexible, premium workplaces and environments.

THE JEB STORY

With showrooms in Hong Kong, China, Singapore and Malaysia, and an extensive distribution and dealer network spanning APAC, EMEA, North America, Canada and Mexico, JEB are renowned in the industry as leaders in creating the best in innovative, quality, performance built environments.

Our 30+ years of experience have seen us expand our services and brands to deliver a complete, one-stop, 360° scalable solution to assist you at every stage from project management, concept, design and development to prototyping, production, fit-outs and installation.

360° TURNKEY SERVICE & SOLUTION

From our leading, certified high performance office partitions, built-in & bespoke furniture solutions, customised façades and architectural features to our sustainable office and hygiene solutions, you'll find every tailored solution you need catered to and delivered to the highest of standards.

MAKING BUSINESS SUSTAINABLE

“Sustainability is critical to business, our people and our planet.”

It is at the heart and core of our company's vision and mission. We are focused on inciting and enabling sustainable design, processes and practices throughout each of our key businesses.

The journey to net zero doesn't happen overnight and we continue to review our processes, practices and suppliers to ensure we are implementing the latest in green standards.

GROUP ISO

We have recently been awarded #ISO9001, #ISO14001 and #ISO45001 certifications across the whole group for Hong Kong, Singapore, Kuala Lumpur, Beijing, Shenzhen & Shanghai. This globally recognised standard ensures that our products and services meet the needs of our clients and customers with an effective quality management system and demonstrates our commitment to continually improving on our products and services.

LEED CERTIFICATION

LEED is the most widely used green building rating system around the world. We strive to improve product knowledge and minimise our carbon footprint through healthy, highly efficient and cost-saving practices. This is applicable across our different architectural products and services and can help your project receive and improve its LEED rating.

IMS

We have established, implemented and maintained an IMS management system in order to prevent pollution, protect the environment, prevent work-related injury and ill health, enhance health and safety workplaces, take advantage of risks and opportunities and provide quality products and services.

GREEN CERTIFICATIONS

Our range of sustainable furniture options come with green compliance certificates and test reports to guarantee your project meets its sustainability requirements. Our sister company Sustainable Office Solutions® also offers quality, circular furniture from designer brands that are in need of a second life.

X-SERIES

The X-SERIES highlights the glass component of a partition and minimises the aluminum frames to create a very lightweight and contemporary appearance.

A beautifully bevelled door frame integrates seamlessly with adjacent glass panels.

SUMMIT

SUMMIT reflects JEB's pledge to innovation. It features single and double-glazed partitions, slim-frame acoustic sliding doors, with quality guaranteed ISO-certified laboratory tests. Its minimal extrusions allow contractors to install the system with complete ease.

BROOKLYN

Brooklyn evokes the charm of historic architecture through high contrast frames and subtle detailing, yet is tailored to fit into modern interiors. Achieve an industrial look and feel with this meticulously calculated design. The contours and contrasting elements have been measured to the finest detail, providing a system that gives a modern take on classic design.

TECHNICAL DATA SHEET

Partition / Door Composition	Description	Acoustic Performance
Single Glazed Partition	13.52mm Laminated Glass	STC 38
Single Glazed Door	13.52 mm Laminated Glass	STC 35

The GT consists of ultra-slim and contemporary frames. This composition guarantees the tranquillity, privacy, and sleekness that clients nowadays seek.

While door seals are specifically designed to ensure maximum acoustic performances, the ultra-slim single glazed system give a modern look to any office through natural lighting and transparency.

PLUS integrates art and function to create spaces that accommodate individual preferences. With its elegance, refined details and exceptionally high acoustic performance, PLUS is ahead of its time and will remain a classic for years to come. It is JEB's first collaboration with world-renowned architect KplusK to produce PLUS.

TECHNICAL DATA SHEET

Partition Composition	Description	Acoustic Performance
Double Glazed Partition	10mm Tempered Glass on both sides	STC 37
Double Glazed Partition	11.52mm Laminated Glass on both sides	STC 49

TECHNICAL DATA SHEET

Partition Composition	Description	Acoustic Performance
Solid Panels	12mm Gypsum Board with 1mm Steel Finish on both sides	STC 49
Double Glazed Partition	6mm Tempered Glass on both sides	STC 42
Double Glazed Partition	6mm Tempered Glass + 8mm Tempered Glass	STC 47

DIVIDE

The DIVIDE partition system by JEB has been developed with ease of relocation and flexibility in mind while maintaining a streamlined. And contemporary look and feel. Panels come in an unlimited range of finishes which simply 'hook' on to the load-bearing structure. This makes DIVIDE the perfect option for companies that have a high rate of churn.

STUDIO DOOR

With recording studio soundproofing standards as a benchmark, JEB's design team created the Studio Door series. And comes in both double and single glazed options. The door profiles are ultra slim and lightweight creating a stylish and contemporary office environment.

TECHNICAL DATA SHEET

Door Composition	Description	Acoustic Performance
Single Glazed Door	12mm Tempered Glass	STC 32
Single Glazed Door	13.52mm Laminated Tempered Glass	STC 38

Double Glazed Door	11.52mm Laminated Tempered Glass on both sides	STC 43

PLUS DOOR

PLUS integrates art and function to create spaces that accommodate individual preferences. With its elegance, refined details and exceptionally high acoustic performance, PLUS is ahead of its time and will remain a classic for years to come. It is JEB's first collaboration with world-renowned architect KplusK to produce PLUS.

SUMMIT

SLIDING DOOR

SUMMIT reflects JEB's pledge to innovation. The slim-frame acoustic sliding doors come with quality guaranteed ISO-certified laboratory tests. Its minimal extrusions allow contractors to install the system with complete ease.

TECHNICAL DATA SHEET

Door Composition	Description	Acoustic Performance
Single Glazed Sliding Door	12mm Tempered Glass	STC 32
Single Glazed Sliding Door	13.52mm Laminated Glass	STC 33
Double Glazed Sliding Door	8mm Tempered Glass + 10mm Tempered Glass	STC 36
Double Glazed Sliding Door	9.52mm Laminated Glass on both sides	STC 37

TECHNICAL DATA SHEET

Door Composition	Description	Acoustic Performance
Double Glazed Door	8mm Tempered Glass + 10mm Tempered Glass	STC 36

ECO DOOR

The ECO Door's clean contemporary aesthetic is matched with its high performance acoustic properties of STC 36. With no glass cut-outs or coloured back glass, the ECO Door offers a seamless, sleek appearance as a competitive price.

STACKADE

The STACKADE System is a unique sliding, space dividing solution which can efficiently and effectively transform your workplace. Its contemporary aesthetic and easy-to-use cascading panels ensure maximum acoustic performance, and offers a user-friendly, economical alternative to the operable wall.

TECHNICAL DATA SHEET

Composition	Description	Acoustic Performance
3 Sliding + 1 Fixed Single Direction	12mm Tempered Glass	STC 29
3 Sliding + 1 Fixed Single Direction	13.52mm Laminated Glass	STC 36
4 Sliding + 2 Fixed Opposing Directions	11.52mm Laminated Glass	NIC 33 (Field Test)

TECHNICAL DATA SHEET

PW 100	100mm Thick Panels with 16mm Chipboard on both sides (Telescopic Panel)	STC 56

INTEGRA

JEB'S INTEGRA OPERABLE WALL offers refined aesthetics while meeting stringent acoustical performance standards. INTEGRA provides flexibility to create open workspaces, with options of both solid and glazed panels that maximise light transmission without compromising acoustic integrity.

FEATURE PARTITIONS

Whether you're looking for curved or trapezium partitions or various glass options and features, we specialise in customising solutions to meet your design and aesthetic needs and requirements.

FEATURE GLASS & SWITCHABLE GLASS

Easily transform your space from open and shared to private and intimate with switchable glass that changes the opacity from clear to opaque, or add to your design with various feature glass options.

CUSTOM COLOUR FINISHES & WOOD GRAIN

Set the mood & tone for a productive workplace by adding a unique look to your design with custom colours and wood grain finishes.
