## Description

ARKUSTIC SYSTEM is a Next-Generation Acoustic Slimline Partition System, engineered to redefine modern spatial design with exceptional acoustic performance and aesthetic finesse. Designed with both form and function in mind, ARKUSTIC offers advanced single and double-glazed glass partition solutions, delivering optimal sound insulation without compromising transparency or style.

ARKUSTIC combines minimalist design with advanced acoustic engineering to create sleek single and double-glazed partitions that provide both visual openness and exceptional sound insulation for modern, high-performance spaces.

### Single Glazed Slim-Framed Partition System

NEXA Slim is a refined single glazed partition system engineered for modern interiors where minimalism meets acoustic comfort. With ultra-slim aluminum profiles and seamless glass integration, it delivers a sleek architectural expression while offering moderate sound insulation. Ideal for high-end workspaces, meeting rooms, and collaborative zones, NEXA Slim creates open, light-filled environments without compromising on privacy or performance.

### Key Features

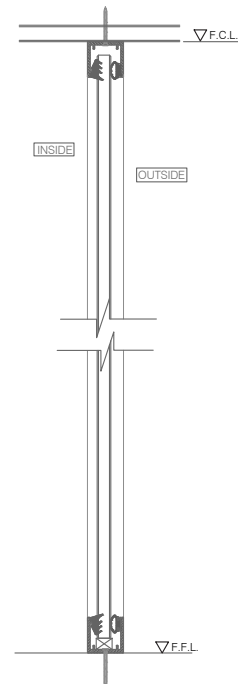

1. Profile: H-26 × W-26 mm
2. Max Panel: H-3000 × W-1400 mm (subject to access)
3. Finish: Anodized / powder-coated
4. Material: High Strength T6-6063 Aluminium
5. Glass: 10-12 mm tempered, 13.52 mm laminated
6. Acoustics: Up to 38 dB (Rw)

### Application

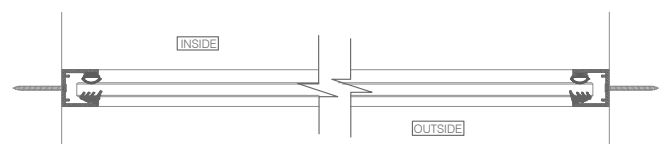

1. Transparent yet sound-insulated spaces
2. Modern interior designs
3. Offices and meeting rooms

### Single Glazed Partition System with Enhanced Base Profile

NEXA 40 offers the same elegant, mullion-free look as NEXA Slim, with a slightly raised 40mm base channel that provides added presence and installation flexibility. With its slim 26mm width and refined aluminum finish, NEXA 40 is ideal for designers looking for minimalist aesthetics with a subtle architectural edge.

### Key Features

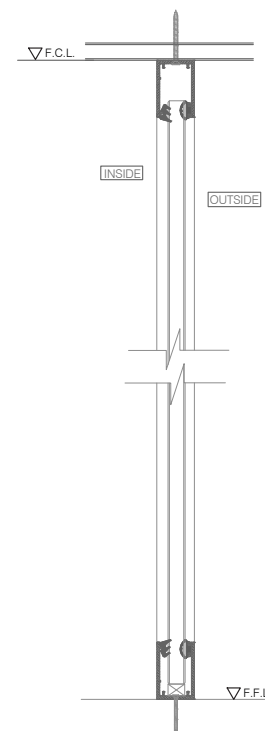

1. Profile: H-26 × W-26 mm
2. MaxPanel: H-3000-3200×W-1400mm(subject to access)
3. Finish: Anodized / powder-coated
4. Material: High Strength T6-6063 Aluminium
5. Glass: 10-12 mm tempered, 13.52 mm laminated
6. Acoustics: Up to 38 dB (Rw)

### Highlights

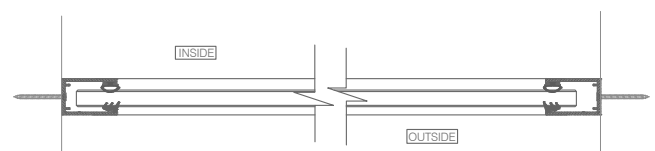

1. 40 mm base for visual grounding
2. Sleek design with seamless transitions
3. Flexible design with optional mullions & transoms
4. Glass options: fluted, frosted, tinted
5. Upgradable to double glazing
6. Clean alignment with concealed joints
7. Great for offices and meeting spaces
8. Quick install with lasting durability

### Double Glazed Partition System with Enhanced Base Profile

Designed with the same outer profile, NEXA FLX Double Glazed provides improved acoustic insulation with a neat, slim-framed appearance. Architects and project teams can switch from single to double glazing without redesigning the framework maintaining visual continuity across the floorplate.

#### Key Features

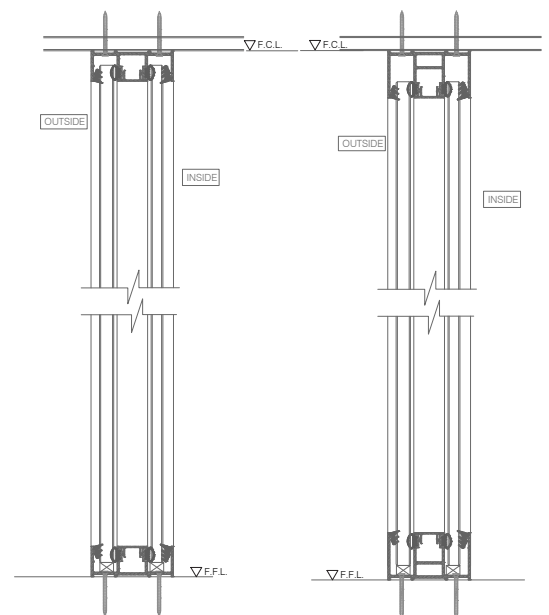

1. Profile: H-26/40 mm × W-70 mm
2. MaxPanel: H-3000×W-1400mm(subject to access)
3. Finish: Anodized / powder-coated
4. Material: High Strength T6-6063 Aluminium
5. Glass: 10-12 mm tempered, 13.52 mm laminated
6. Acoustics: Up to 40 dB (Rw)

#### Highlights

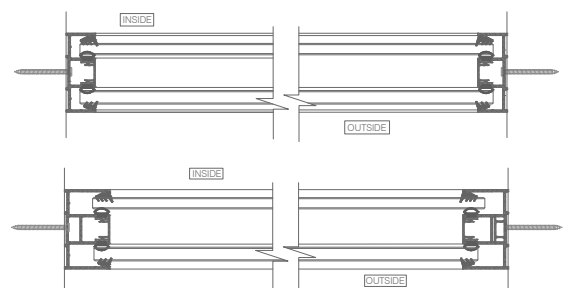

1. Excellent sealing with double-layer gasket configuration.
2. Sleek design with seamless transitions
3. Flexible design with optional mullions & transoms
4. Glass options: fluted, frosted, tinted
5. Acoustic optimization without visual bulk
6. Compatible with NEXA FLX door system
7. Tool-less clip change between single/double glazing
